Replaceable Battery

Unlike most household robotic vacuums our robot comes with a replaceable battery that is light and easy to carry. Allowing it to be run all day!

Multiple Sensors

The latest in 3D Lidar and camera sensor technology allow the robot to simultaneously map and clean. Allowing you to visualize the cleanliness of your spaces.

Disposable Bag

The dust bag is disposable and easy to replace, letting your staff breathe easy. No need to dump any dust pan or cartridge!

Edge Cleaning

Enhanced intake, roller and wheel design allow the robot to maneuver closer to edges, improving edge cleaning.

Automation

More Automation equals a higher return on investment. Using a Robot Operator, you can remove thousands of pounds of dust and debris from your facility while also making your cleaning staff's lives easier. Robots don't need breaks!

Cleanliness

Robots clean the whole floor. We clean 175% of the floor using SLAM technology, competing directly with spot cleaning. Automated cleaning means a more thorough and consistent carpeted floor cleaning.

Labor Benefits

Leverage never having to pick up a vacuum again to combat the labor shortage. TAILOS automation reduces turnover, overtime and workers comp claims, while increasing employee retention and consistent labor!

Tech Specs

Dimensions: 12.7in x 20.7in x 8.5in

Weight: 18 lbs

Operating Speed: 1.5 ft/sec

Brush Width: 11"

Suction: ~88CFM

Dust Bag Capacity: 1.7 L

Cleaning Capacity: 1,000 ft²/hr

Noise Level: 62 dB

Operating Time: 1 hr 30 min/battery

Battery Capacity: 17 Ah

Input Voltage: 110 & 220v
